**Subject:** update on SJRWP-Watershed fingerprint presentation

---

Hi Brian:

The following shows the original and new slide from the dioxin fingerprint presentation. The original was 'HSC Hotspots' using unchanged terminology that was given to us when we were tasked to complete the fingerprinting comparison. However, from the coordinators call this morning, concerns were expressed that 'Hotspots' may unnecessarily intensify tensions in next week's meeting. The SJRWP team agrees and propose using a title such as: 'HSC Areas of Noted Elevated Concentrations'. We will proceed using this new terminology unless you indicate to us that Water wants to keep 'Hotspots' for whatever reason for the meeting. Thanks and let me know.

Thanks,

Stephen L. Tzhone
